

MUBEENA KABEER

Bangalore, India | Open to Relocate: Dubai, UAE
+91 8129209312 | mubeenuqi@gmail.com | [linkedin.com/in/mubeena-kabeer](https://www.linkedin.com/in/mubeena-kabeer)

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience turning enterprise data into actionable business insights for a global Fortune-500 account. Skilled in SQL, Python, and Power BI (DAX, Power Query, data modeling), with a track record of building executive dashboards, automating recurring reports, and driving measurable cost savings — including a 35% reduction in licensing costs and 30% improvement in budgeting accuracy across a 10,000+ record dataset. Works directly with cross-regional stakeholders to translate open-ended business questions into KPI scorecards and reporting solutions.

CORE SKILLS

Data & Analysis: SQL (joins, CTEs, window functions, subqueries), Python (Pandas, NumPy), Advanced Excel (Power Query, Pivot Tables, VLOOKUP/XLOOKUP, INDEX-MATCH), statistical analysis, data reconciliation, root cause & trend analysis

BI & Visualization: Power BI Desktop & Service, DAX (measures, calculated columns, DAX queries), data modelling, Star Schema, ETL, Data Cleaning, KPI scorecards, executive dashboard design

Automation & Delivery: Power Automate, Gen-AI Assisted PowerShell Automation, dashboard/report performance monitoring, Agile/Scrum, Jira, Confluence, stakeholder requirement gathering

PROFESSIONAL EXPERIENCE

Data & Operations Analyst

May 2023 – Present

IBM India (supporting IKEA Global — enterprise licensing & analytics function)

Bangalore, India

- Own end-to-end delivery of Power BI dashboards for a global enterprise account — data connectivity, Power Query transformation, data modeling, DAX measures, testing, and publishing.
- Analyzed a 10,000+ record enterprise licensing dataset and built DAX-driven cost dashboards that flagged 6,000+ misallocated or duplicate licenses, driving a 35% cost reduction and 30% improvement in budgeting accuracy (contributing to est. \$1.8M–\$2.3M in monthly savings).
- Partner directly with stakeholders across regions to translate open-ended business questions into data models and KPI scorecards, iterating until reports match real operational needs.
- Write advanced SQL to extract, validate, and reconcile large enterprise datasets before they reach a dashboard, catching data-quality issues early.
- Automated recurring reporting and KPI tracking using Power Automate and Python, cutting manual reporting effort by ~10 hours/month and enabling near real-time alerting across 300+ monthly cases.
- Supported a large-scale system migration involving 149,000+ user records — validating, cleaning, and reconciling data down to a final accurate dataset of ~68,000 active users.
- Operate within Agile/Scrum sprints (Jira, Confluence), coordinating with engineering and infrastructure teams to resolve upstream data-pipeline issues before they affect reporting.
- Monitor and troubleshoot dashboard and data-source performance post-publish, keeping reports accurate and reliable at scale.

System Engineer

Aug 2022 – Apr 2023

Tech Mahindra

India

- Completed structured training in Linux systems and relational databases, building the technical foundation for a transition into BI development and data analytics.

EDUCATION

Bachelor of Technology — Electronics & Communication Engineering

Toc H Institute of Science and Technology | GPA: 8.64/10 | 2022

- IEEE Chairperson (2021); Best Outgoing Student Award (2022)

CERTIFICATIONS

- Microsoft Power BI Data Analyst Associate — data modeling, DAX, report design, Power Query
- AWS Certified Cloud Practitioner (2026) — cloud infrastructure, data services, SDLC fundamentals
- Python for Data Science & SQL for Data Analysis (2025) — applied analytics, statistical modeling, querying
- IBM Agile Explorer (2024) | Enterprise Design Thinking Practitioner (2025)
